

MAI LE HUY HOANG

Full-Stack Software Engineer

hoangmai020603@gmail.com | (+84) 971-172-603 | portfolio-irus.pages.dev | github.com/lrusVN | linkedin.com/in/hoangmai020603

OBJECTIVE

Performance-driven Full-Stack Software Engineer with expertise in building enterprise-grade web applications, resilient backend architectures, and high-performance interfaces using TypeScript, Nuxt 4, React 19, and Laravel 12 (PHP 8.2+). Proven experience in engineering idempotent payment gateways (VNPay, MoMo, ZaloPay, PayPal), concurrency-safe stock reservation engines, and deploying edge-rendered apps on Cloudflare Workers and resource-tuned Docker environments.

EDUCATION

Industrial University of Ho Chi Minh City (IUH)

Bachelor of Engineering in Information Technology

- **Major:** Computer Networks and Web Development.
- **Core Coursework:** Distributed Systems, System Architecture & Integration, Database Management Systems, Advanced Web Engineering.

2021 – Present

Ho Chi Minh City, Vietnam

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ESNext), PHP (8.2+), SQL, Bash Shell.

Frontend Ecosystem: Nuxt 4 (Vue 3.5), React 19, Pinia, Redux, Vite, Webpack 5, Tailwind CSS (v3/v4), SCSS Modules, Framer Motion.

Backend & APIs: Laravel 12, Express.js, Node.js, RESTful API Design, Idempotency Architecture, Queue Workers, Webhooks, State Machines.

Databases & Storage: PostgreSQL (Supabase / Supavisor Session Pooler), MongoDB, Cloudflare R2, AWS S3 (Presigned URLs).

DevOps & Cloud: Docker (Multi-process containers), Nginx, Cloudflare Workers (Nitro Edge SSR), Render, Linux Server, CI/CD, Git.

EXPERIENCE

TTR IT VN Technology Co., Ltd.

August 2025 – January 2026

Full-Stack Developer — Nuxt 3, PHP (CodeIgniter 4), MySQL, Payment Gateways, Webhooks, JWT & 2FA

Ho Chi Minh City, Vietnam

- **Financial Transaction & Ledger Logic:** Engineered transaction management workflows (deposits, transfers, currency exchange, settlements), maintaining double-entry balance consistency across multi-currency digital wallets.
- **Payment Gateway & Webhook Ingestion:** Integrated domestic fintech aggregators (AppotaPay, PayME) with automated webhook callback handlers and signature verification, automating real-time payment reconciliation and status synchronization.
- **Frontend Financial Workflows:** Developed responsive Nuxt 3/Vue 3 interfaces for wallet top-up workflows, recipient address books, and dynamic fee calculations with strict Vee-Validate/Yup schemas and Pinia state stores.
- **Security & Compliance Auditing:** Implemented an automated audit logging system to enforce tamper-evident operator audit trails on sensitive financial mutations, alongside Google Authenticator (2FA) and scoped B2B merchant API key authentication.

Asia Industrial Equipment Co., Ltd.

February 2022 – April 2023

IT Helpdesk & System Support — Infrastructure Administration, Network Troubleshooting, SEO

Ho Chi Minh City, Vietnam

- Administered enterprise IT infrastructure, DNS records, internal servers, and company SEO, ensuring 99.9% uptime for business services.
- Diagnosed and resolved hardware, software, and network incidents for 50+ staff and clients, maintaining an internal knowledge base.

PROJECTS

IrusGear — Enterprise E-Commerce Ecosystem | Nuxt 4, Vue 3.5, Pinia, Laravel 12, PostgreSQL, Cloudflare Workers

2025 – 2026

GitHub: frontend / backend | URL: irusgear.me

- **Edge SSR & Tri-Surface Architecture:** Deployed Nuxt 4 on Cloudflare Workers (Nitro module) serving 3 role-gated portals in 1 codebase: Customer Storefront, Admin Operations Center (Chart.js analytics), and Courier/Shipper Mobile Portal with proof-of-delivery workflow.
- **State Architecture & Data Pipeline:** Managed 26 modular Pinia stores with SSR cookie forwarding and promise-deduplicated auth; built automated catalog crawlers with persistent checkpoint/resume mechanisms.
- **Contextual AI Assistant:** Integrated a streaming AI chatbot API providing real-time hardware recommendations and order tracking.

Team2Hand — MERN E-Commerce Platform | React 19, Redux, Webpack 5, Node.js, Express, MongoDB, Cloudflare R2

2024 – 2026

GitHub: github.com/lrusVN/BTL_WEB | URL: team2hand.pages.dev

- **Custom Webpack 5 Pipeline:** Configured a zero-boilerplate Webpack 5 build pipeline from scratch with Babel, SCSS loaders, and code splitting, significantly optimizing production bundle size compared to default CLI starters.
- **Obsidian Glass Design System:** Architected a luxury dark-first design system utilizing CSS variable tokens and modular SCSS inspired by iOS Liquid Glass principles, ensuring complete UI consistency and responsive fluidity.
- **Zero-Downtime R2 Migration:** Developed an automated migration service to transition legacy base64 images from MongoDB to Cloudflare R2 Object Storage, drastically shrinking database payload and cutting image load latency.

Personal Cyberpunk Portfolio | React 19, TypeScript, Tailwind CSS v4, Vite, Framer Motion v12, Howler.js, i18next

2026

GitHub: github.com/lrusVN/lrus-Portfolio-Pages | URL: portfolio-irus.pages.dev

- **Modern Tech Adoption:** Built with React 19 and Tailwind CSS v4 utilizing @theme OKLCH tokens for zero-runtime styling, combined with Framer Motion spring physics and a terminal-inspired aesthetic.
- **Type-Safe 5-Language Localization:** Implemented react-i18next covering EN, VI, JA, KO, ZH with strict TypeScript Dictionary typing, preventing missing translation keys at compile time.
- **Interactive Web Audio Engine:** Engineered a tactile sound feedback system with Howler.js, defensively handling browser autoplay unlock policies.
